

Streamline Your Saliva Workflow

KEY FEATURES

Collection & Preservation

For simple and non-invasive saliva collection and preservation of DNA/RNA/Exosome in saliva samples at ambient temperature

- ✓ **Easy to use, non-invasive** collection method for saliva samples
- ✓ Collect and **preserve DNA and exosomes for more than 12 years** and **RNA for up to 2 months** at room temperature
- ✓ Conveniently **stabilize saliva samples for easy transport at ambient temperature**. RNA & DNA preservation devices **inactivate the samples, making them safe to handle**
- ✓ **Preserve high-quality nucleic acids for all downstream** applications including NGS, PCR/RT-PCR, microarrays, SNPs, methylation studies, and more
- ✓ **Samples can be mailed by regular post** or courier service – shipping accessories are available

What Do Our Customers Say About us?

We have been using Norgen's Saliva DNA Collection and Preservation Devices Cat. RU49000 and the Norgen's Saliva DNA Isolation Kit (Cat. RU45400) for many years for our world wide projects that include populations from different countries with very challenging collection and storage conditions. **The kits have helped us even when the samples had to stay at tropical room temperature for long period of time. The kits worked perfectly for us...**

Murdoch University

KEY FEATURES

Isolation & Purification

For the rapid purification of high-quality DNA/RNA from preserved and fresh saliva samples.

- ✓ **Compatible with preserved saliva samples** collected using Norgen's Saliva DNA Collection and Preservation Devices or other devices, **as well as fresh saliva samples**
- ✓ **Isolate high quality** genomic DNA or RNA
- ✓ **Fast and easy processing** available in choice of spin-column, 96-well, or magnetic bead format

Saliva DNA Kits

- Saliva DNA Isolation Kit (Cat. RU45400)
- Saliva DNA Isolation 96-well Kit (Cat. RU35200)
- Saliva DNA Isolation Kit Dx (Cat. Dx45400)
- Saliva DNA Isolation Kit (Magnetic Bead System) (Cat. RU55400)
- Saliva DNA Isolation 96-well Kit (Magnetic Bead System) (Cat. RU62900)

Saliva RNA Kits

- Saliva/Swab RNA Purification Kit (Cat. 69100)
- Saliva/Swab RNA Purification Kit Dx (Cat. Dx69100)
- Saliva/Swab RNA Purification 96-well Kit (Cat. 69300)
- Saliva/Swab RNA Purification 96-well Kit Dx (Cat. Dx69300)

Application

Compatible with Downstream Applications: Biomarker Discovery, Exosome & EV Research, Respiratory Disease Diagnostics Oral Microbiome & Infectious Disease. **We offer comprehensive NGS services book a free consultation at norgenbiotech.com/services.**
